Journal of Electromagnetic Waves and Applications (JEWA)

Contents of Volumes 1 – 2

Volume 1 Number 1

Microwave Modelling of Snow and Soil 1
E. Schanda

On Some Inverse Methods in Electromagnetics 25
T. M. Habashy and R. Mittra

Radiative Wave Equations for Vector Electromagnetic Propagation in Dense Nontenuous Media 59
L. Tsang and A. Ishimaru

Theoretical Models for Polarimetric Radar Clutter 73
M. Borgeaud, R. T. Shin, and J. A. Kong

Volume 1 Number 2

Exact Image Theory for the Analysis of Microstrip Structures 95
I. V. Lindell, E. Alanen, and A. T. Hujanen

Time Domain Analysis of Nonuniformly Coupled Lines 109
Q. Gu, J. A. Kong, and Y. E. Yang

Transient Response of a Vertical Electric Dipole (VED) On a Two-Layer Medium 133
S. Y. Poh and J. A. Kong

Passive Remote Sensing of Dense Nontenuous Media 159
L. Tsang

Volume 1 Number 3

The Method of Moments in Electromagnetics 181
R. F. Harrington

Unimoment Method for Electromagnetic Wave Scattering 201
K. K. Mei

On the Application of the Generalized BiConjugate Gradient Method 223
T. K. Sarkar

The Finite-Difference Time-Domain (FD-TD) Method for Electromagnetic Scattering and Interaction Problems 243
A. Taflove and K. R. Umashankar

An Overview of Time-Domain Integral-Equation Models in Electromagnetics 269
E. K. Miller

Volume 1 Number 4

Scattering by a Radial Line Joined to a Coaxial Waveguide 299
S. J. Zhang and D. G. Dudley

A Component Decomposition Model for Evaluating Atmospheric Effects in Remote Sensing 323
S. Li, Z. M. Wan and J. Dozier

A Geometrical Optics Approximation for Refraction at a Planar Interface Between Arbitrarily Lossy Media 349
J. Loane and S. W. Lee

Exact Solution of the Sommerfeld Half-Plane Problem: A Path Integral Approach Without Discretization 377
R. W. Ziolkowski

Volume 2 Number 1

Decoupling of the Ordinary and Extra-Ordinary Waves Inside an $\bar{\bar{\epsilon}} - \bar{\bar{\mu}}$ *Anisotropic Medium with Applications to Propagation and Radiation Problems* 1
J. L. Tsalamengas

Electromagnetic Scattering by a Dielectric Cylinder Partially Covered by Conductors 21
X. C. Yuan, R. F. Harrington, and S. S. Lee

Near-Field Spillover from a Subreflector: Theory and Experiment 45
S. W. Lee, R. Acosta, A. R. Cherrette and P. T. Lam

Equivalent Circuit Modeling of Finline End-Coupling and Short-End by Generalized Transverse Resonance Analysis 63
G. Bartolucci and R. Sorrentino

General Cylindrical Model for Focussed Power Deposition from an External Antenna System 77
J. R. Wait

A Numerical Comparison of the Phase Perturbation Technique with the Classical Field Perturbation and Kirchhoff Approximations for Random Rough Surface Scattering 85
S. L. Broschat, L. Tsang, A. Ishimaru and E. I. Thorsos

Explicit Approximations for the Static Capacitance of a Microstrip Patch of Arbitrary Shape 103
E. F. Kuester

Volume 2 Number 2

The Electromagnetic Field of Constant-Density Distributions in Finite Regions 141
J. G. Fikioris

Some Remarks on Scattering by a Rotating Dielectric Cylinder 155
D. Schieber

Identification of Terrain Cover Using the Optimum Polarimetric Classifier 171
J. A. Kong, A. A. Swartz, H. A. Yueh, L. M. Novak and R. T. Shin

Exact Image Theory for the Slab Problem 195
I. V. Lindell

Volume 2 Number 3/4

Lateral Electromagnetic Pulses Generated by a Vertical Dipole on a Plane Boundary between Dielectrics 225
R. W. P. King

Dyadic Green's Functions for a Rectangular Waveguide Filled with Two Dielectrics 245
C. T. Tai

Extension of the Tseng-Cheng Pattern Synthesis Technique 255
Y. U. Kim and R. S. Elliott

Electromagnetic Penetration into a Conducting Circular Cylinder through a Narrow Slot, TM Case 269
J. R. Mautz and R. F. Harrington

Current on a Wire Parallel to Two Walls of a Rectangular Cavity 295
H. Rahman and J. Perini

Wave Theory of a Thin Film Polarization Converter 319
S. R. Seshadri

Understanding Reverberating Chambers as an Alternative Facility for EMC Testing 339
M. T. Ma

Receiving and Scattering Characteristics of Circular Patch Antenna Array 353
M. A. Blischke, E. J. Rothwell, K. M. Chen, and J. L. Lin

On Single-Mode Polarization Preserving Multi-Layered Optical Fiber . . 379
C. Yeh

Modified Radiative Transfer Theory for a Two-Layer Anisotropic Random Medium 391
J. K. Lee and J. A. Kong

Volume 2 Number 5/6

Quasistatic Profile Reconstruction of a Circular Cylinder 429
J. Bach Andersen and S. Berntsen

Radiation Modes of Circular Dielectric Waveguides 445
N. Morita

In Vitro Impedance of Biological Tissues in the Frequency Range 0.1 to 1.3 GHz 459
S. Ray and J. Behari

Eddy Currents in Heterogeneous Mixtures 473
C. Mätzler

Scatterer Discrimination Based Upon Natural Resonance 481
M. A. Morgan

Extended Least Squares Iterative Techniques in the Solution of Electromagnetic Scattering by Penetrable Objects 503
R. W. C. Van der Veeken

Transverse Coupling Between Two Surface Wave Antennas 523
H. Cory, C. G. Parini, and A. D. Olver

Optimization of Difference Pattern Sidelobes in the Presence of Fictitious Blockage 535
A. G. Derneryd

Correction of Probe Position Errors in Antenna Near Field Transformation 545
S. F. Mahmoud

The Use of Near Field Probe in the Analysis of Radome Performance . . 555
R. F. Schindel and A. J. Blanchard

A Volume-Surface Integral Equation for Electromagnetic Scattering by Inhomogeneous Cylinders 573
J. M. Jin, V. V. Liepa, and C. T. Tai

Volume 2 Number 7

Generalization of a Theorem Proved by Abelés and Lekner Relating to Two Juxtaposed Slabs with Inhomogeneous Refractive Indices 593
J. Heading

On the Integration of Image Sources in Exact Image Method of Field Analysis 607
I. V. Lindell

Measurement of Three-Dimensional Temperature Distribution Inside Dielectric Objects Using Near-Field Radiometry 621
P. G. Cottis, N. K. Uzunoglu, and P. S. Papakonstantinou

Calculation of Accurate Complex Resonant Frequency of an Open Microstrip Resonator using the Spectral Domain Method 635
S. Nam and T. Itoh

Effect of Curvature on the Backscattering from a Leaf 653
K. Sarabandi, T. B. A. Senior, and F. T. Ulaby

Angles-of-Arrival Fluctuation at 20 GHz on Earth-Space Path 671
H. Fukuchi, K. Nakamura, K. Okamoto, and T. Okuyama

Volume 2 Number 8

A Physical Optics Technique for Prediction of Multiple Reflections from Polygonal Plate Structures 687
R. G. Atkins and R. T. Shin

Analysis of Long Slot Coupled H-Plane Tee Junction 713
B. N. Das, G. S. N. Raju, and A. Chakraborty

Splash Wave Modes in Homogeneous Maxwell's Equations 725
P. Hillion

Transmission Line Analogy for Calculating the Effective Permittivity of Mixtures with Spherical Multilayer Scatterers 741
A. Sihvola and I. V. Lindell

Effective Propagation Constants of Dense Nontenuous Media with Multi-Species of Particles 757
K. H. Ding and L. Tsang
